

# Database System

## Homework #2 (Chapter 4)

- 4.7. Consider the LIBRARY relational database schema shown in Figure 4.6. Choose the appropriate action (reject, cascade, set to NULL, set to default) for each referential integrity constraint, both for the *deletion* of a referenced tuple and for the *update* of a primary key attribute value in a referenced tuple. Justify your choices.

**Figure 4.6**  
A relational database  
schema for a  
LIBRARY database.

**4.8.** Write appropriate SQL DDL statements for declaring the LIBRARY relational database schema of Figure 4.6. Specify the keys and referential triggered actions.

**4.12.** Specify the following queries in SQL on the database schema of Figure 1.2.

**STUDENT**

Name	Student_number	Class	Major
Smith	17	1	CS
Brown	8	2	CS

**COURSE**

Course_name	Course_number	Credit_hours	Department
Intro to Computer Science	CS1310	4	CS
Data Structures	CS3320	4	CS
Discrete Mathematics	MATH2410	3	MATH
Database	CS3380	3	CS

**SECTION**

Section_identifier	Course_number	Semester	Year	Instructor
85	MATH2410	Fall	07	King
92	CS1310	Fall	07	Anderson
102	CS3320	Spring	08	Knuth
112	MATH2410	Fall	08	Chang
119	CS1310	Fall	08	Anderson
135	CS3380	Fall	08	Stone

**GRADE\_REPORT**

Student_number	Section_identifier	Grade
17	112	B
17	119	C
8	85	A
8	92	A
8	102	B
8	135	A

**PREREQUISITE**

Course_number	Prerequisite_number
CS3380	CS3320
CS3380	MATH2410
CS3320	CS1310

**Figure 1.2**  
A database that stores student and course information.

- Retrieve the names of all senior students majoring in 'CS' (computer science).
- Retrieve the names of all courses taught by Professor King in 2007 and 2008.
- For each section taught by Professor King, retrieve the course number, semester, year, and number of students who took the section.
- Retrieve the name and transcript of each senior student (Class = 4) majoring in CS. A transcript includes course name, course number, credit hours, semester, year, and grade for each course completed by the student.

**4.13.** Write SQL update statements to do the following on the database schema shown in Figure 1.2.

- a.** Insert a new student, <'Johnson', 25, 1, 'Math'>, in the database.
- b.** Change the class of student 'Smith' to 2.
- c.** Insert a new course, <'Knowledge Engineering', 'CS4390', 3, 'CS'>.
- d.** Delete the record for the student whose name is 'Smith' and whose student number is 17.
